## OPEN HOUSE PUBLIC HEARING

FOR

THE PROPOSED MILAN BELTWAY EXTENSION PROJECT LINKS THE COMPLETED MILAN BELTWAY ON THE SOUTH SIDE OF THE ROCK RIVER TO THE JOHN DEERE EXPRESSWAY ON THE NORTH.

### DATE

THURSDAY, DECEMBER 19, 2002

1:00 P. M. - 6:00 P. M.

### LOCATION

HOLIDAY INN  
6902 27<sup>th</sup> STREET  
MOLINE, IL 61265  
(Ambrose Room B)

### PURPOSE

- VIEW GRAPHIC DISPLAYS
- DISCUSS DESIGN CONCEPTS
- ANSWER QUESTIONS
- OBTAIN PUBLIC COMMENTS AND INPUT

This meeting is accessible to disabled individuals. Persons planning to attend this meeting who will need a sign language interpreter, or other similar accommodations should notify, either by telephone or letter, Mr. Geoff Smith at the Illinois Department of Transportation, 819 Depot Avenue, Dixon, IL 61021 or (815) 284-5510, or Transmission for the Deaf (815) 284-1667 at least five days prior to the meeting so that reasonable accommodations can be made.

## Memorandum

---

To: File  
From: Deana Hermes *WH*  
Subject: Public Hearing held on December 19, 2002  
Date: February 28, 2003

---

FAU Route 5822  
Section 1-3  
Rock Island County  
Job No. P-92-096-84  
Milan Beltway Extension over the Rock River

The Department held a Public Hearing on December 19, 2002 for the Milan Beltway Extension over the Rock River.

The meeting was held at the Holiday Inn in Moline, IL with approximately 150 people in attendance during the 5-hour period. There were a lot of people that we actual property owners; however, many were just citizens that were interested in the project and wanted to know when it was going to be constructed.

The majority of the people that I spoke with were anxious for construction to begin. They have lived in the area for awhile and know the long history of the project. There were several people who did have concerns about the acquisition of their property. However, Mr. Brian Mayer, the District's Condemnations Engineer was available to answer their questions.

I spoke with Dr. Casey Kenney who has an office located on 3<sup>rd</sup> Street. He is very upset about the lack of direct access to Rock Island. I had spoken to Dr. Kenney in the past and I had also met with him at his office regarding general questions about the project. I explained to Dr. Kenney at the Public Hearing that based on our traffic projections that the majority of the vehicles would be trying to get to John Deere Road and heading east towards Moline. We also discussed options of getting to and from Rock Island through the 52<sup>nd</sup> Avenue interchange.

Mr. Ben Acri from Acri Corporation and I discussed his access during construction. He is concerned about direct access on Airport Road. We explained that during construction a temporary access will be constructed; however, the permanent access would be located off of the new side road that will be constructed once the project has been completed.

Page 2

I spoke with Mr Jim Flannery who owns the Forrest of Flowers shop on Airport Road. He would prefer his proposed access point to be relocated from what it appears on the plans. We have investigated this and feel that we should be able to accommodate his request.

Numerous other items were discussed throughout the day which pertained to access, amount of proposed right-of-way, how to drive through the proposed interchanges, the need for an additional lane going into Rock Island, when construction would start, etc. In general, the public seemed positive about the project and were looking forward to construction of the Milan Beltway Extension.

# Illinois Department of Transportation

## Memorandum

To: Deana Hermes  
From: Larry Hill  
Subject: Comments Received at Public Hearing  
Date: January 9, 2003

FAU 5822  
Section 1-3  
Milan Beltway Extension  
Rock Island County

1. Mr. Doug Riel of Rock River Valley Association questioned us to the quantity of acre feet of fill would be placed in the flood plain of the Rock River by the Milan Beltway Extension and what are the Department's mitigation requirements were for such fill? I stated there would be some storage at the proposed wetlands, but only to satisfy wetland requirements, not 1 to 1 floodplain storage replacement. I stated that this would be a regulatory requirement addressed by the hydraulic engineering policies of the Department. Therefore the District Hydraulic Engineer would respond to this concern.

Upon inquiring 12-23-02, I found Bill McWethy off for the rest of the month. I sent Mr. Riel and e-mail stating such and Bill an e-mail asking him to respond. Mr. Riel's address is:

Mr. Doug Riel  
Rock River Valley Assoc.  
P.O. Box 577  
Moline, IL 61766

2. Mr. Doug Riel (see previous address) also questioned about what are the Department's policies on removal of ice jams at bridges the Department builds. I told him that I would obtain this policy from the District Operation Engineer.

He further questioned as to what special ice removal policy the District has adopted for the I-74 bridge over the Rock River (currently under construction). He stated that the combination of the new pier for one bridge and the existing bridge piers now restricts the Rock River channel more the ever, rising the probability of an ice jam higher than previous years. He requested a dynamite allotment or cranes with large breaker balls be pre-positioned so as to be able to react on short notice to break up any jammed ice up. He stated he felt if the ice breaking was done primarily along the shore, it would be most effective. I asked District Construction Section Engineer to respond by e-mail.
